

SXSWedu 2016 QUOTES

“What happens when you get education enthusiasts from across the country in one crazy, fun and innovative city? You are inspired. You are challenged. You are reinvigorated and most importantly come away from SXSWedu just a little bit smarter...”

Getting Smart, March 14, 2016

“The future might not be divvied up equally in the larger world — not everyone gets to live in Tomorrowland — but those fortunate enough to be at SXSWedu are steeped in it.”

The Seventy Four, March 10, 2016

“SXSWedu 2016 presented an outstanding chance to hear and participate in some of the most important conversations currently taking place in education.”

Edmentum, April 4, 2016

“There was no shortage of ed tech to take in at SXSWedu 2016. Whether it was teacher-driven instructional management tools, digital citizenship curriculum solutions or STEM-fueled satellite projects, there was a little something for everyone.”

Education Dive, March 15, 2016

“If you believe that forward-thinking conferences like SXSWedu are more than just dreaming, but actually provide a window to the future of education, then I think it’s fair to expect that the schools of tomorrow are going to look quite a lot like the best child-care centers you can imagine.”

Education Week, March 11, 2016

“It was rewarding to have a knowledgeable, connected audience for a topic I feel so passionately about, and we were able to start a conversation that has continued well after the conference...”

Getting Smart, April 3, 2016

“SXSWedu is on the cutting edge...SXSWedu is a celebration and nurturing of new ideas, technologies, and innovations in education for industry experts and the public.”

Learnography, March 16, 2016

“All of this makes SXSWedu an essential stop for anyone interested in issues that drive us...inequality and innovation.”

The Hechinger Report, March 7, 2016

“What I discovered was a smaller, energetic conference filled with some of the sharpest minds in bettering public education...gatherings such as SXSWedu are vital for exchanging ideas...”

“...the ideas at SXSWedu could have an impact on our collective future well after the last techie has gone home.”

USA TODAY, March 15, 2016
